

1 ABSTRACT OF THE DISCLOSURE

2 A tool coating with colored patterns is attached to a tool, has a tool
3 coating foundation having a surface and at least one colored pattern layer. The at
4 least one colored pattern layer may form exquisite and colorful characters and
5 figures and may be attached to any surface of the tool coating foundation instead
6 of only flat surfaces of the tool coating body. Therefore the appearance of the
7 tool is more attractive and a user can see the characters and figures of the tool
8 coating and identify the tool easily.
